

DOBILAS

## DOBILAS (Clover)

Typeface Dobilas was born with a purchase of new Molotow transformer marker. At first it was just sketches for my personal logo, but soon I came up with an idea to make an initial letters for portfolio chapters. After making few needed glyphs I've decided to make full set of Latin and Cyrillic alphabets. This typeface was designed on the basis of Apple command button and two more conditions. First and main condition was to have vertical and horizontal strokes, well rounded, same weight with 90° degree angle corners. The second condition was to build glyph share from only one continuous line or having two separate shapes. The entire font has 3 weights - lean, stock and fed. Typeface Dobilas best fits for initials, monogramic style logo of title case. It only has caps, numbers and sentence punctuation. 2010
