Regurgitation
The quick brown fox
jumps over the lazy dog.

The Regurgitation font was first released in late 2000. Who knows what I was thinking to create a liquidy, gurgly font with such a terrible name? (According to my early notes, “Once again I looked at my anatomy poster to name a font, but the name suits it well. It’s kinda watery-looking.”)

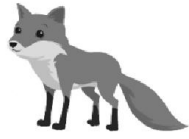

This is a FREE font.

It contains uppercase and lowercase letters, numbers, and basic punctuation.
You can view the full character map at QuickBrownFoxFonts.com.

My free fonts may be distributed through any media, as long as this PDF file is included, you are not selling the fonts, and you don't claim them as your own.

Whatever you use the font for, I'd love to see what you come up with! Feel free to contact me through my website and tell me about your project.

Thank you kindly!
